Our company, which has been serving in the treatment sector since 1989, has entered into a joint investment with Aquamatch Inc. in 1996 and started designing and producing in Turkey. Since 2003, it has been an engineering and treatment company with 100% Turkish capital.

Our company has become one of the world's leading companies of water and wastewater treatment sector by signing big references and projects in 4 continental and more than 50 countries.

Professional treatment solutions Turning your water into benefit

- 9000 m² indoor production facilities in Aydın
- Installation of mega desalination and wastewater recovery facilities
- Over 20 years of deep knowledge and manufacturing experience in membrane technologies
- Sales and technical services with 16 dealers in 10 different cities
- Installation and operation of turnkey water & wastewater treatment systems at home and abroad
- Engineering, design, manufacturing, sales and after sales services staff of about 300 people together with our dealers

Drinking & Usage Water

Capacity:

255 m³/h SWRO System

570 m³/h Multi Media Filtration System

Çolakoğlu Metallurgy / İzmit /Turkey

Process Water for Metal Industry

Capacity:

400 m³/h SWRO System

700 m³/h Ultrafiltration System

Avşa Island / Balıkesir / Turkey Drinking & Usage Water

Capacity:

167 m³/h SWRO System

417 m³/h Coagulation System & Multi Media Filtration System

→ Sea Water Reverse Osmosis Systems

Sea Water Reverse Osmosis (SWRO) systems are used to separate dissolved solids from sea water with membrane separation in order to get low conductivity fresh water.

Sea Water Reverse Osmosis systems are crossflow membrane separation units without backwash. Membranes are cleaned in place with chemicals time to time.

General Features

- TFC Spiral Wound Membrane
- FRP Membrane Housing
- Duplex/SS 904 High Pressure Pump
- High Efficiency Energy Recovery System - Pressure Exchanger
- High Pressure Piping, Duplex
- Low Pressure Piping, PE
- Neopren Coated Carbon Steel / FRP Cartridge Filter
- PLC Control Panel & Operator Panel

SWRO Systems Technical Features

Model	TDS ppm	Capacity m³/h	Recovery %	Vessel Quantity	Membrane Quantity	Connection Inlet/Outlet

ASW 108 + ERI	36.000 – 46.000	1883 – 1321	57 – 40	18	108	DN150/DN150

* The product water capacities in the table are the projection data obtained at 25 ° C design water temperature.

* The operating pressures and efficiencies of the systems vary for different TDS values.

* There is no energy recovery unit in ASW 03, ASW 06 and ASW 12 models.

→ Filtration Systems

Filtration systems are used to remove physical impurities such as sediment, turbidity, suspended solids, colour, odour and smell.

Filters remove particulates/sediments with various sizes and density by holding them with different media layers inside the tank. Filters are backwashed automatically in order to remove these particulates/sediments from filter bed.

General Features

- FRP / Epoxy Coated Carbon Steel Tanks - Neopren Coated Inside
- 4 - 6 Bar Operating Pressure
- Pneumatic Actuated Butterfly Valves
- HDPE / PVC Piping
- PLC Control Panel
- Electricity 220 V / 50 Hz / 1 pH

* Tank height is total height including feet, sizes vary according to the manufacturer.

→ Ultrafiltration Systems

Ultrafiltration (UF) systems are used for filtration of especially sea water, river water, well water and spring water that have dense and variable physical impurity load by membrane technology.

Sea Water Pre Treatment UF Systems Vertical Series Technical Features

Model	Turbidity	Capacity m/h	Membrane Area m ²	Flux lt/m ² .h
	NTU			
CHZ UFD 03	10 - 30	13,9 - 10,0	192	51,9

CHZ UFD 48	10 - 30	222,4 - 159,4	3072	51,9

→ Bernoulli / Sweden

Bernoulli filters are self-cleaning filters with a cleaning operation based on the Bernoulli principle, which ensures continuous filtration of water in pressurized systems. The most important part of Bernoulli Filter is the disc mounted on a pneumatic cylinder that is . The Bernoulli filter filtration range is 100–2000 microns.

Usage Areas

- Pre filtration of sea, well and river waters
- UF system input
- Cooling tower lines

→ STF Filtros / Spain

STF filters are used for filtration in seawater treatment plants, drinking water facilities, agricultural irrigation and physical barrier against to zebra mussels, cogeneration facilities, cooling towers. STF filter filtration range is 10–1000 microns.

→ Accessories

Various treatment equipments are used to help main treatment systems in power plants.

- Measurement stations
- In UF, RO, MBDI ve EDI systems
- Measurement of turbidity and Silica

- Cartridge & Bag Filters
- Sensitive filtration required

- Chemical Dosing Systems
- Pre Filtration, UF, RO systems.

→ Dolomite Systems

The low pH and conductivity values of RO product water are increased by using dolomite filter.

Dolomite Filter Technical Features

Model	Capacity m ³ /h	Tank Dimensions cm	Connection	Dolomite	Area cm
				kg	
RC 30 M	10	77 x 225	DN 40	675	0,48
RC 36 M	14	92 x 231	DN 50	975	0,7
RC 42 M	19	107 x 242	DN 65	1350	0,93
RC 48 M	24	122 x 243	DN 65	1800	1,19

* The filtration speed of the table is 20 m/h. * Speed for backwash capacity is 30 m/h. * Tank height is total height including feet, sizes vary according to the manufacturer.
